

Choosing the Best Photo for Your Pet's Urn

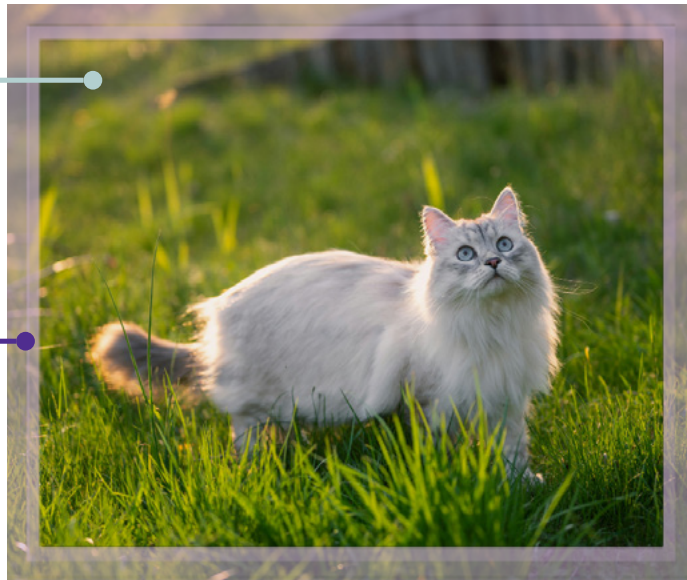

We want your pet's photo to look beautiful on their urn. The guide below will help you choose a photo that works best with the shape.

SAFE AREA

Keep your pet and important parts of the photo inside this area.

BACKGROUND

This outer area may be trimmed during printing, so only background should appear here.

For the best result, please provide a photo that is:

- Uncropped (the original photo if possible)
- Landscape orientation (wide rather than tall, if available)
- The largest file size available
- Not too close-up, so there is enough background to adjust the photo to suit the urn's shape

Keep the important parts of the photo within the purple area, leaving some extra background around the outside to allow for trimming.

Small Urn: Pets 0-15kg
Image area: 98mm x 82mm

Medium Urn: Pets 16-39kg
Image area: 129mm x 108mm

Large Urn: Pets 40kg+
Image area: 171mm x 127mm

Our designer will adjust your photo to fit the shape of the urn.

Need Help Choosing a Photo?

If you're unsure which photo will work best, you're welcome to send a few options and our designer will help choose the most suitable one.
